# Segmentation 2023

## Acknowledgments

This Segmentation Report 2023 is the result of the collaboration of the following stakeholders to whom we are grateful.

The Local Government Academy extends its appreciation to the Bureau Of Local Government Supervision (BLGS), under the leadership of Director Debie T. Torres, CESO IV, for generously sharing the 2022 Seal of Good Local Governance (SGLG) Data.

To the Research and Policy Development Division, particularly the Research Section, for managing the project and ensuring the completion of this report.

To the interns from the San Beda University who were actively involved in data encoding in preparation for analysis.

## SEGMENTATION 2023

### Executive Summary

This report provides an examination of the capacity and performance of local government units (LGUs) levels based on the 2022 Seal of Good Local Governance (SGLG) assessment data. The primary objective of this analysis is to classify or segment LGUs into the capacity-performance quadrants.

The analysis categorizes LGUs into four quadrants based on their capacity and performance levels. Quadrant 1 comprises LGUs with high capacity and performance, Quadrant 2 includes LGUs with high performance but low capacity, Quadrant 3 encompasses LGUs with low capacity and performance, and Quadrant 4 consists of LGUs with high capacity but low performance.

LGUs in Quadrant 3 emerged as the highest priority for capacity development interventions. This quadrant comprised 538 LGUs, accounting for 31.37% of the total. The analysis also revealed variations in the distribution of LGUs across quadrants based on regions, income classifications, and levels. Even within the quadrants, the percentage of LGU compliance with key governance indicators also varies.

This report provides information that can be used as a basis for planning policies and programs for capacity development.

## SEGMENTATION 2023

### Introduction

The Segmentation of LGUs into Capacity-Performance Quadrants is part of the initiatives for Capacity Development Support Plan of the Department of the Interior and Local Government (DILG), through the Local Government Academy (LGA), during the transition to Full Devolution. The changes in the bureaucracy brought about by the Supreme Court's ruling on the Mandanas-Garcia petitions and the subsequent issuance of Executive Order No. 138, series of 2021, titled "Full Devolution of Certain Executive Branch Functions to Local Governments, Establishment of a Devolution Committee, and Other Related Measures" called for more efficient and responsive strategies on capacity development interventions. Using performance data from the Seal of Good Local Governance, the Segmentation Analysis was conceptualized to segment LGUs based on their capacity and performance levels. The results will show the priority local government units for interventions.

This report will begin by outlining the framework used to identify capacity and performance indicators, then the data collection and analysis methods employed, and present the results.

### The Segmentation Framework & Methods

The Segmentation of LGUs used the assessment results in the SGLG to account for the variations in the capacities and performances of LGUs. The precursory logic behind the process is that the increase in the national tax allocation should enable the LGUs to demonstrate better Capacity and Performance to deliver their devolved functions.

To operationalize this, the Segmentation was developed through a series of pivotal steps: Indicator Selection, Formula Development, Formula Deployment (LGU Assessment), Descriptive Baseline: Assigning Descriptors to LGU Scores, and Segmentation to LGU Capacity-Performance Quadrants.

#### Indicator Selection

The selection of capacity and performance indicators involved a purposive process of curation from the array of SGLG indicators, guided by the following principles: absorptive capacity, service delivery, and integrity in the use of public funds. These principles were considered crucial in determining the readiness of LGUs to deliver their devolved functions. In applying these principles, the goal was to pinpoint indicators that would best capture the essence of capacity and performance.

Then, the indicators were grouped into either the capacity or performance category according to the DILG Capacity Development Framework. This categorization allowed for a more structured and precise evaluation, as it recognized that capacity and performance are distinct but interconnected dimensions of LGU functionality.

Capacity Indicators were those related to planning, budgeting, and reporting of local funds, establishment of local councils, and assignment of *plantilla* personnel to key local positions. The LGU Capacity, as a determinant of Performance, can be exhibited through planning. Development plans are the foundation upon which local governance and service delivery are built. LGUs with well-structured plans are better equipped to utilize their resources judiciously in the implementation of programs, projects, and activities that benefit their local communities.

## SEGMENTATION 2023

**Table 1**

*Capacity Indicators*

Cluster	Indicators	Connection to the Precursory Logic
Cluster A: Planning, Budgeting, Reporting	Approved Annual Budget	<i>Absorptive capacity:</i> Efficient financing of local development hinges on the timely preparation of the budget at the local level.
	Compliance with the Full Disclosure Policy	<i>Integrity:</i> To adhere to the Financial Disclosure Program (FDP), LGUs must provide complete transparency by disclosing specific financial transactions to demonstrate how funds were managed, disbursed, and utilized.
	DRR-CCA-related Plans and Documents <ul style="list-style-type: none"> <li>● PDPFP/CLUP</li> <li>● LDRRMP</li> <li>● LCCAP</li> <li>● Contingency Plan</li> </ul>	<i>Service Delivery:</i> Having legally mandated local plans in place will enable LGUs to identify, strategize, and allocate resources in alignment with Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA) considerations.
	Approved 10-year Solid Waste Management Plan	<i>Service Delivery:</i> The LGU's capacity to safeguard the environment is demonstrated by its compliance with RA 9003, particularly through the adoption of a 10-year Solid Waste Management (SWM) Plan as outlined in Sections 2 and 17 of the Act.
Cluster B: Strategic Bodies	Local Development Councils <ul style="list-style-type: none"> <li>● PDPFP/CDP</li> <li>● LDC Composition</li> </ul>	<i>All priority principles:</i> The Local Development Councils (LDCs) are mandated to play a crucial role in strategizing the allocation, implementation, and monitoring of local funds.
	Local Disaster Risk Reduction and Management Council	<i>All priority principles:</i> The Local Disaster Risk Reduction and Management Councils (LDRRMCs) fulfill strategic and integrative functions in the allocation and management of the Disaster Risk Reduction and Management Fund (DRRMF).
	Local Solid Waste Management Board	<i>All priority principles:</i> The Board must be convened following the provisions outlined in RA 9003.
	Anti-Drug Abuse Council	<i>All priority principles:</i> It is organized under RA 9165, the Comprehensive Dangerous Drugs Act of 2002, and relevant DILG Memorandum Circulars.

## SEGMENTATION 2023

Cluster	Indicators	Connection to the Precursory Logic
Cluster C: <i>Plantilla</i> Officers	Local Disaster Risk Reduction and Management Officer	<i>All priority principles:</i> The capacity of LGUs and offices is significantly influenced by the presence of the appropriate human resources or <i>plantilla</i> personnel.
	Local Social Welfare and Development Officer	
	Persons with Disabilities Affairs Officer	
	Local Tourism Officer	

Meanwhile, Performance Indicators pertain to the utilization, reporting, and auditing of local funds and the delivery of services and facilities. For instance, LGUs can convincingly demonstrate Performance through the efficient and transparent utilization of public funds and the delivery of facilities and services. Such accomplishments directly contribute to the well-being of their constituents, reflecting a tangible outcome of their governance.

**Table 2**  
*Performance Indicators*

Cluster	Indicators	Connection to the Precursory Logic
Cluster A: Financial Administration	Audit Opinion	<i>Integrity:</i> translates to clear and accountable fund disbursement.
	Utilization of Local Development Fund	<i>Absorptive Capacity and Service Delivery:</i> Indicates effective management of available financial resources to help LGUs implement priority development initiatives.
Cluster B: Disaster Risk Reduction and Management (DRRM)	Utilization of Local Disaster Risk Reduction and Management Fund	<i>Absorptive Capacity and Service Delivery:</i> Indicates effective management of available financial resources for DRRM purposes.
	Disaster Risk Reduction and Management Service Delivery Outputs <ul style="list-style-type: none"> <li>● Early Warning System</li> <li>● Evacuation Center</li> <li>● Prepositioning of Goods and Resources</li> <li>● Search and Rescue or Emergency Response Teams</li> </ul>	<i>Service Delivery:</i> As provided by RA10121 and other complementary policies.
Cluster C: Other Funds	Peace and Order Council Performance Audit	<i>Service Delivery:</i> Implementation of the plan means the provision of priority action and program thrusts for peace and order and public safety.

## SEGMENTATION 2023

Cluster	Indicators	Connection to the Precursory Logic
	Completion of Local School Board Plan	<i>Service Delivery:</i> For the provision of facilities, materials, et.al., for education.
	Residential Care Facility	<i>Service Delivery:</i> The capability of the LGU to advance the welfare and well-being of the vulnerable sectors with the provision of care facilities that are LGU-managed or owned.

### Formula Development

The segmentation formula utilizes a weighted average approach, giving higher importance to specific indicators that align more closely with the assumed impact of the increase in local revenue share.

At the indicator level, this assignment of weights depends on the impact on local fiscal resources and the complexity of the indicator's requirement. Indicators that reflect foundational characteristics or processes of the NTA/IRA increase logic received higher weight values. For instance, in the context of Performance, the utilization rate of the Local Development Fund (LDF) carries more significance than the utilization rate for Public Order and Public Safety (POPS). This is because the LDF, constituting 20% of the IRA, serves as a proxy for an LGU's spending capacity, while POPS is limited to one functional area.

Then, the complexity of the indicator is also considered. For example, the Local Development Council (LDC) functionality sub-indicators encompass both approved plans and composition (representation), indicating a more intricate scope of LGU processes compared to other councils, which are solely assessed based on their existence according to prescribed composition. (representation of sectors). As a result, the Local Development Council (LDC) is assigned a higher weight value compared to the indicators for the other strategic bodies.

Moreover, weight assignments in the Capacity and Performance formula differ due to the variation in the number of indicators, Capacity includes 12 indicators, while Performance comprises only 7. The variation in weight application is detailed in Table 3.

## SEGMENTATION 2023

**Table 3**

*Cluster Weight Assignments*

Variable/Category	Explanatory Note
Capacity	<p>Two-Level Weight Assignment</p> <p>There are 12 indicators in Capacity, with two tiers of weight assignments.</p> <ol style="list-style-type: none"> <li>1. Individual indicators are first 'weighted,' according to impact and complexity.</li> <li>2. Cluster weights are then applied.</li> </ol> <p>Cluster weight assignments are as follows:</p> <ul style="list-style-type: none"> <li>● Cluster A: Planning, Budgeting, Reporting = 40%</li> <li>● Cluster B: Strategic Bodies = 40%</li> <li>● Cluster C: <i>Plantilla</i> Officers = 20%</li> </ul> <p>The lower weight assigned to Cluster C (<i>Plantilla</i> Officers) recognizes that Clusters A and B hold greater significance and entail more intricate LGU processes concerning the underlying logic (Capacity to effectively and efficiently allocate resources through planning).</p>
Performance	<p>Direct Indicator Weight Assignment:</p> <p>The weights assigned to performance indicators are distributed directly among these component indicators based on the general principles of impact and complexity.</p> <p>However, the subtotal of 'clustered' indicators still follows the same logic as the Capacity. Specifically, cluster weight subtotals are as follows:</p> <ul style="list-style-type: none"> <li>● Cluster A Financial Administration = 40%</li> <li>● Cluster B DRRM-related = 35%</li> <li>● Cluster C Other funds = 25%</li> </ul> <p>The variation in the weight values reflects the recognition that the Financial Administration indicators in Cluster A convey a higher impact value and entail more complex processes compared to Cluster B and C.</p>

As shown below, Table 4 shows the weight assignments for Capacity Indicators. There are three (3) clusters: 1) Cluster A: Planning, Budgeting, Reporting, 2) Cluster B: Strategic Bodies, and Cluster C: *Plantilla* Officers. Clusters A and B have equal weights of 40%, while Cluster C is 20%.

## SEGMENTATION 2023

**Table 4**

*Weight Assignments for Capacity Indicators*

Clusters	#	Indicators	Weight Value
Cluster A: Planning, Budgeting, Reporting	1	Approved Annual Budget	40%
	2	Compliance with the Full Disclosure Policy	25%
	3	DRR-CCA-related Plans and Documents <ul style="list-style-type: none"> <li>● PDPFP/CLUP (10%)</li> <li>● LDRRMP (5%)</li> <li>● LCCAP (5%)</li> <li>● Contingency Plan (5%)</li> </ul>	25%
	4	Approved 10-year Solid Waste Management Plan	10%
Sub-total			100%
<b>Cluster A</b>			<b>40%</b>
Cluster B: Strategic Bodies	5	Local Development Councils <ul style="list-style-type: none"> <li>● PDPFP/CDP (25%)</li> <li>● LDC Composition (30%)</li> </ul>	55%
	6	Local Disaster Risk Reduction and Management Council	15%
	7	Local Solid Waste Management Board	15%
	8	Anti-Drug Abuse Council	15%
	Sub-total		
<b>Cluster B</b>			<b>40%</b>
Cluster C: <i>Plantilla</i> Officers	9	Local Disaster Risk Reduction and Management Officer	40%
	10	Local Social Welfare and Development Officer	20%
	11	Persons with Disabilities Affairs Officer	20%
	12	Local Tourism Officer	20%
Sub-total			100%
<b>Cluster C</b>			<b>20%</b>
<b>Weighted Average of all the Clusters</b>			<b>100%</b>

As shown below, Table 5 shows the weight assignment for Performance Indicators. There are also three (3) clusters: 1) Cluster A: Financial Administration, 2) Cluster B: Disaster Risk Reduction and Management (DRRM), and Cluster C: Other Funds. Cluster A has the highest weight of 40%, Cluster B has 35%, while Cluster C is 25%.

## SEGMENTATION 2023

**Table 5**

*Weight Assignments for Performance Indicators*

Clusters	#	Indicators	Weight Value
Cluster A: Financial Administration	1	Audit Opinion	20%
	2	Utilization of Local Development Fund	20%
Cluster B: Disaster Risk Reduction and Management (DRRM)	3	Utilization of Local Disaster Risk Reduction and Management Fund	15%
	4	Disaster Risk Reduction and Management Service Delivery Outputs <ul style="list-style-type: none"> <li>● Early Warning System (5%)</li> <li>● Evacuation Center (5%)</li> <li>● Prepositioning of Goods and Resources (5%)</li> <li>● Search and Rescue or Emergency Response Teams (5%)</li> </ul>	20%
Cluster C: Other Funds	5	Peace and Order Council Performance Audit	12%
	6	Completion of Local School Board Plan	12%
	7	Residential Care Facility	1%
<b>Weighted Average of all the Clusters</b>			<b>100%</b>

### Formula Deployment (LGU Assessment)

Each of the indicators have assigned weights (WA), the formula will then be applied to calculate the score of LGUs.

$$LGU\ Score = (Indicator\ 1\ x\ WA) + (Indicator\ 2\ x\ WA) + \dots + (Indicator\ n\ x\ WA)$$

The SGLG Data uses binary data, containing entries of 1s and 0s. In binary data, each entry represents one of two possible states, often used to denote the presence (1) or absence (0) of a particular characteristic or to represent a true/false condition. Data were encoded in a spreadsheet, where the weighted sum formula was employed to calculate the LGU Scores. Tables 6 and 7 show sample formula deployment in capacity and performance categories or variables.

**Table 6**

*Sample Formula Deployment (Capacity)*

Clusters	#	Indicators	Weight Assigned (WA)	LGU A		LGU B	
				SGLG Score	Weighted Score	SGLG Score	Weighted Score
Cluster A: Planning, Budgeting, Reporting	1	Approved Annual Budget	40%	0	0	1	40

## SEGMENTATION 2023

Clusters	#	Indicators	Weight Assigned (WA)	LGU A		LGU B	
				SGLG Score	Weighted Score	SGLG Score	Weighted Score
	2	Compliance with the Full Disclosure Policy	25%	1	25	1	25

## SEGMENTATION 2023

**Table 7**

*Sample Formula Deployment (Performance)*

Clusters	#	Indicators	Weight Value	LGU A		LGU B	
				SGLG Score	Weighted Score	SGLG Score	Weighted Score
Cluster A: Financial Administration	1	Audit Opinion	20%	1	20	0	0
	2	Utilization of Local Development Fund	20%	1	20	0	0
Cluster B: Disaster Risk Reduction and Management (DRRM)	3	Utilization of Local Disaster Risk Reduction and Management Fund	15%	1	15	0	0
	4	Disaster Risk Reduction and Management Service Delivery Outputs					
		Early Warning System	(5%)	1	5	1	5
		Evacuation Center	(5%)	0	0	1	5
		Prepositioning of Goods and Resources	(5%)	1	5	1	5
		Search and Rescue or Emergency Response Teams	(5%)	1	5	1	5
Cluster C: Other Funds	5	Peace and Order Council Performance Audit	12%	1	12	1	12
	6	Completion of Local School Board Plan	12%	1	12	1	12
	7	Residential Care Facility	1%	1	1	1	1
<b>Weighted Average of all the Clusters</b>			<b>100%</b>		<b>95</b>		<b>45</b>

In the provided sample, LGU A achieved a score of 66 for capacity and 95 for performance, while LGU B attained scores of 96 for capacity and 45 for performance.

## SEGMENTATION 2023

### Descriptive Baseline: Assignment of Descriptors to LGU Scores

At this stage of the process, each LGU has received scores for both capacity and performance. The next logical step is to assign appropriate descriptors for these scores. The technical working group has decided to use either 'high' or 'low' descriptors for scores through a defined threshold referred to as a descriptive baseline. This threshold is derived from the average scores of all LGUs at a specific level, meaning there are different descriptive baselines for capacity and performance at every LGU level. The formula for determining the descriptive baseline follows the average formula of adding all the LGU scores and then dividing the sum by the number (n) of scores:

$$DB = \frac{(LGU\ Score\ 1) + (LGU\ Score\ 2) + \dots + (LGU\ Score\ n)}{n}$$

If an LGU's score equals or exceeds the descriptive baseline for its LGU type, be it province, city, or municipality, then it is categorized as "high." This signifies that the LGU surpasses the national average for its LGU type. The first segmentation analysis was based on the 2019 SGLG Data, which resulted in the following descriptive baselines:

**Table 8**

*Descriptive Baseline for Capacity and Performance*

LGU Type	Descriptive Baseline for Capacity	Descriptive Baseline for Performance
Provinces	87.41%	80.51%
Cities	88.29%	84.87%
Municipalities	77.11%	70.73%

These baseline values are maintained for this report (shown in Table 8). Maintaining the baseline will enable data comparisons over time and reduce confounding factors that could otherwise impact the interpretation of the results.

### LGU Capacity-Performance Quadrants

As Capacity and Performance levels are determined, LGUs will be segmented into the Capacity-Performance Quadrants. Figure 1 illustrates the Capacity-Performance Quadrants.

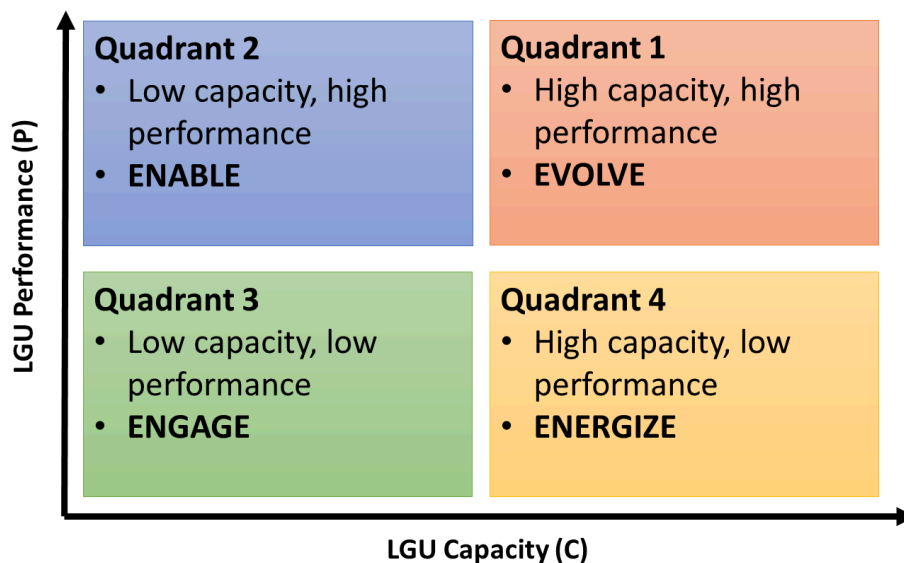

- Quadrant 1 comprises LGUs with High levels of both Capacity and Performance. These LGUs are considered to model LGUs with exemplary practices. The capacity development strategy for these LGUs is EVOLVE, aimed at propelling them to lead in achieving development goals.
- Quadrant 2 includes LGUs with High Performance but Low Capacity. While they have achieved high-performance benchmarks, capacity gaps limit their potential. The capacity development strategy for these LGUs is ENABLE, designed to resolve capacity issues and reinforce performance.
- Quadrant 3 encompasses LGUs with low levels in both Capacity and Performance measures. These LGUs are considered the priority targets for capacity development interventions.

## SEGMENTATION 2023

Hence, the strategy is ENGAGE, aimed at providing them with various interventions to address both capacity and performance challenges.

- Quadrant 4 consists of LGUs with High Capacity but Low Performance. Despite their strong capacity, capacity does not translate into high performance. The strategy for these LGUs is ENERGIZE, focused on addressing the issues hindering their performance.

**Figure 1**  
*LGU Capacity-Performance Quadrants*

## Results

This section presents the information and insights derived from the segmentation analysis, connecting them to the core research questions of this report. The first part presents the segmentation of LGUs into quadrants based on their capacity and performance levels. Following that, the variations in this segmentation across different levels, income classes, and regions are examined. Subsequently, an exploration is conducted into how these identified quadrants differ concerning their compliance with Capacity and Performance Indicators.

### Segmentation of LGUs

The 2022 SGLG Data comprises information on one thousand seven hundred fifteen (1,715) LGUs, encompassing all levels. As illustrated in Table 9, the overall figures reveal that Quadrant 1 contains the highest number of LGUs, totaling 753, which constitutes 43.91% and is the most populous among the quadrants. Quadrant 3 follows with the second-highest number of LGUs, totaling 538 or 31.37%. Quadrant 4 comprises 240 LGUs, accounting for 13.99%. Quadrant 2 has the fewest LGUs, with only 184 or 10.73%.

## SEGMENTATION 2023

**Table 9**

*Segmentation of LGUs in Quadrants Based on Capacity and Performance Levels*

Quadrants	No. of LGUs	Percentage of LGUs
Quadrant 1	753	43.91%
Quadrant 2	184	10.73%
Quadrant 3	538	31.37%
Quadrant 4	240	13.99%
<b>Total</b>	<b>1,715</b>	<b>100%</b>

### Regional and Demographic Variations

This section of the analysis shows the variation in segmentation by region, LGU levels, LGU types, and income classes. In this report, it will cover three levels of LGUs: Provinces, Cities, and Municipalities. Moreover, the different types of cities will also be included, such as Highly Urbanized Cities, Independent Component Cities, and Component Cities. Table 10 illustrates the distribution of LGUs across these levels.

- Quadrant 1 comprises 33 Provinces, 74 Cities, and 646 Municipalities.
- Quadrant 2 includes 5 Provinces, 14 Cities, and 165 Municipalities.
- Quadrant 3 consists of 35 Provinces, 41 Cities, and 462 Municipalities.
- Quadrant 4 encompasses 8 Provinces, 17 Cities, and 215 Municipalities.

Among Provinces, the majority fall into Quadrant 3 (35 or 43.2%) and Quadrant 1 (33 or 40.7%). Regarding Cities, the majority belong to Quadrant 3 (41 or 81.5%). In the case of Municipalities, the majority are in Quadrant 1 (646 or 43.4%).

**Table 10**

*Segmentation of LGUs Across Levels*

LGU Level	Quadrant 1	Quadrant 2	Quadrant 3	Quadrant 4	Total
Provinces	33	5	35	8	<b>81</b>
Cities	74	14	41	17	<b>146</b>
Municipalities	646	165	462	215	<b>1488</b>
<b>Total</b>	<b>753</b>	<b>184</b>	<b>538</b>	<b>240</b>	<b>1,715</b>

As depicted in Table 11, the segmentation of LGUs in Quadrants varies across regions. The majority of LGUs in Regions I, II, III, NCR, VI, X, XI, XII, and CARAGA fall within Quadrant 1, while the majority of LGUs in Regions V, CAR, VII, VIII, and IX are situated in Quadrant 3. Notably, Regions CALABARZON and MIMAROPA demonstrate a relatively balanced distribution between Quadrants 1 and 3, while Region II lacks any LGUs categorized in Quadrant 2.

## SEGMENTATION 2023

**Table 11**

*Segmentation of LGUs Across Regions*

Region	Quadrant 1	Quadrant 2	Quadrant 3	Quadrant 4	Total LGUs
I	96	12	10	11	129
II	67	0	14	17	98
III	90	17	19	11	137
IV-A	68	20	41	18	147
MIMAROPA	20	2	27	29	78
V	34	11	55	20	120
CAR	30	10	30	13	83
NCR	7	3	4	3	17
VI	62	20	38	19	139
VII	26	19	67	24	136
VIII	36	22	68	23	149
IX	24	9	26	16	75
X	66	8	15	9	98
XI	31	7	8	8	54
XII	28	9	8	8	53
CARAGA	39	7	22	10	78
BARMM	29	8	86	1	124
<b>Total</b>	<b>753</b>	<b>184</b>	<b>538</b>	<b>240</b>	<b>1,715</b>

Table 12 shows the distribution of LGUs across these income classes within the Quadrants. Quadrant 1 predominantly comprises First Class LGUs, constituting 31.5% of this quadrant. In Quadrant 2, LGUs exhibit a more balanced distribution across the first five income classes, except in the Sixth Class. Quadrant 3 primarily consists of Fourth Class LGUs, while Quadrant 4 is dominated by First Class LGUs. The data also had missing values, 3 LGUs in Quadrant 2 and 16 in Quadrant 3 have no income classification.

## SEGMENTATION 2023

**Table 12**

*Segmentation of LGUs Across Income Classes*

Income Class	Quadrant 1	Quadrant 2	Quadrant 3	Quadrant 4	Total LGUs
1st	232	42	79	75	<b>428</b>
2nd	99	22	70	26	<b>217</b>
3rd	134	44	96	38	<b>12</b>
4th	175	45	150	54	<b>424</b>
5th	103	28	112	43	<b>286</b>
6th	10	0	15	4	<b>29</b>

### Compliance Analysis

This section delves into the extent to which LGUs have adhered to the identified Capacity and Performance Indicators based on the 2022 SGLG assessment data, providing insights into the compliance patterns among LGUs. This analysis not only highlights areas of strength but also identifies critical areas where improvement is needed, facilitating a more targeted approach to capacity development interventions.

Table 30-35 shows the number of LGUs that have met the clusters of indicators.

## SEGMENTATION 2023

**Table 30**

*LGU Compliance with Cluster A Capacity Indicators*

	Cluster A Capacity Indicators						
	Annual Budget	FDP	DRR and CCA plans and documents				SWM Plan

	POC Performance Audit	Completion of the LSB Plan	Residential care facility
Number of LGUs	<b>1473</b>	<b>1212</b>	<b>1687</b>
Compliance Percentage	85.89%	70.67%	98.37%

## Conclusion

In this analysis, the primary objective is to categorize LGUs based on their capacity and performance levels, taking into account variations in their compliance with a set of purposively selected indicators based on the 2022 SGLG assessment data. This information serves as a valuable resource or basis for strategically providing capacity development support to LGUs according to their segment or quadrant placement. Quadrant 3 has emerged as a high-priority category, encompassing LGUs that display low levels of both capacity and performance. Additionally, the analysis underscores the influence of demographic characteristics on the distribution of LGUs across regions, income classifications, and levels, indicating diverse intervention needs. Furthermore, the findings also reveal that even within quadrants, there exist disparities in LGUs' compliance with the indicators. This underscores the importance of tailoring interventions to suit the specific and varied requirements of LGUs, even when they are in the same quadrant.

This analysis did not explore detailed case studies or the specific interventions required for each LGU. It only relied on a single data set from a specific period and may not have captured the entire state of LGU capacity and performance. Further research should investigate specific interventions needed for LGUs in each quadrant, such as considering the Capacity Pillars in assessing the strengths and needs of LGUs. The interventions should also be contextually customized to specific LGUs, taking into account their particular challenges, priorities, and resources. In-depth case studies may also provide a deeper understanding of the factors that contribute to their capacity and performance levels.
