Segmentation 2024

Acknowledgements

This Segmentation Report 2024 is made possible through collaborative efforts of the following stakeholders to whom we are grateful.

Foremost, to the Bureau Of Local Government Supervision (BLGS), through the leadership of Director Debie T. Torres, CESO IV, for sharing the 2023 Seal of Good Local Governance (SGLG) Data.

To the Research and Policy Development Division, particularly the Research Section, for managing the project and ensuring the completion of this report.

To the interns from the University of the Philippines who have significantly contributed in the data encoding and analysis.

Executive Summary

This segmentation analysis report examines local government units (LGUs) on the basis of their capacity and performance levels, utilizing the 2023 Seal of Good Local Governance (SGLG) assessment data. The primary objective of this analysis is to classify or segment LGUs into the capacity-performance quadrants.

The analysis categorizes LGUs into four quadrants based on their capacity and performance levels:

- **Quadrant 1:** LGUs with high capacity and performance.
- **Quadrant 2:** LGUs with high performance but low capacity.
- **Quadrant 3:** LGUs with low capacity and performance.
- **Quadrant 4:** LGUs with high capacity but low performance.

LGUs in Quadrant 3, characterized by low levels of both capacity and performance, emerged as the highest priority for capacity development interventions. This quadrant comprises 534 LGUs, accounting for 31.45% of the total. The analysis revealed variations in the distribution of LGUs across quadrants based on regions; income classifications and levels, indicating that diverse interventions are significant across different demographic factors. Even within the quadrants, LGUs demonstrated varying levels of compliance with key governance indicators, highlighting the importance of tailored interventions.

This report contributes to the literature on capacity development, offering information that can be used as a basis for planning capacity development interventions.

Introduction

In 2018, the Supreme Court of the Philippines ruled on the Mandanas-Garcia petitions, affirming that local government units (LGUs) are entitled to a larger share of national taxes, increasing the financial resources of LGUs for its development projects. Through this, LGUs are expected to deliver the public services mandated by the Local Government Code of 1991. Meanwhile, the national government maintains general oversight of LGUs, which will be affected by the high court's ruling as it will substantially decrease the former's resources for implementing its development priorities and programs.

Then, the Executive Department responded by issuing Executive Order No. 138, series of 2021, as a guiding policy to navigate the required bureaucratic adjustments in light of the decreased fiscal resources available at the national level. It mandates National Government Agencies (NGAs) to formulate national policies and strategies that sustain and strengthen LGUs as self-reliant communities and vital partners in national development. The Department of the Interior and Local Government (DILG), through the Local Government Academy (LGA), has been identified as the lead agency on capacity development of LGUs (Section 9, EO 138).

The DILG's existing performance management systems, notably the Seal of Good Local Governance (SGLG), generates comprehensive data concerning LGUs' compliance to devolved functions and services. This data can be used to assess LGUs' capacity and performance, which, in turn, can serve as a basis to inform the design of targeted local government capacity development interventions.

The DILG's Capacity Development Framework defined the concepts of capacity and performance. Capacity refers to the ability of LGUs to perform functions to fulfill accountabilities and produce results, while Performance reflects their effectiveness in fulfilling their mandate and producing desired results (Department of the Interior and Local Government, 2021). To operationalize these abstract concepts, it's imperative to have specific indicators for Capacity and Performance that will enable measurement and evaluation. Fortunately, through careful examination of SGLG data, it encompasses a range of indicators that can be classified into either Capacity or Performance categories. Assessing the capacity and performance accounts for the LGUs' different levels of capacity and performance. By accounting for these variations, capacity development interventions can be targeted based on these information.

Each quadrant represents a distinct grouping of LGUs with specific characteristics based on their compliance with capacity and performance indicators. This segmentation provides information on the capacity development needs of LGUs, highlighting strengths, weaknesses through patterns of compliance.

This report provides information on the levels of capacity and performance of LGUs based on the SGLG assessment data.

SEGMENTATION 2024

Specifically, this report aims to answer the following questions:

1. What is the segmentation of LGUs in the capacity-performance quadrants based on their compliance to key indicators?
2. How does the segmentation of local government units vary across levels, income classes, and regions?
3. What is the level of compliance of LGUs with the Capacity and Performance Indicators?

This report will begin by outlining the framework used to identify capacity and performance indicators. It will then detail the data collection and analysis methods employed. Following this, the report will present the findings and explore their implications.

The Segmentation Framework & Methods

The Segmentation of LGUs used the SGLG assessment results to account for the capacities and performances of LGUs. The precursory logic behind this endeavor is that the increase in the national tax allocation should enable the LGUs to demonstrate better capacity and performance to deliver their devolved functions. Therefore, the segmentation process has the potential to furnish the DILG and LGA with valuable information on the readiness of LGUs to translate their increased revenue share into tangible services for their respective constituents.

To operationalize this, the Segmentation was developed through a series of steps: Indicator Selection, Formula Development, Formula Deployment (LGU Assessment), Descriptive Baseline: Assignment of Descriptors to LGU Scores, and Segmentation into Capacity-Performance Quadrants.

Methods

Indicator Selection

The selection of capacity and performance indicators involved a purposive process of curation from the array of SGLG indicators, guided by the following principles: absorptive capacity, service delivery, and integrity in the use of public funds. Then, the indicators were systematically grouped into either the capacity or performance category, aligning with the established DILG Capacity Development Framework.

Capacity Indicators were those related to planning, budgeting, and reporting of local funds, establishment of local councils, and assignment of *plantilla* personnel to key local positions. Performance Indicators pertain to utilizing, reporting, and auditing local funds and delivering services and facilities.

SEGMENTATION 2024

Table 1. Capacity Indicators

Cluster	Indicator	SGLG 2023 Data Source (column & sheet reference)
Cluster A: Planning, Budgeting, and Reporting (40%)	Approved CY 2023 Annual Budget	CY 2023 Annual Budget, Process
	Compliance with Full Disclosure Policy	FDP Process; FAS_CM, FAS_P
	DRR and CCA plans and documents	
	PDPFP/CLUP	PDPFP/CLUP, Process
	LDRRMP	LDRRM Plan, Process
	LCCAP	Local Climate Change Action Plan, Process
	Contingency Plan	Contingency Plans, Process
	Approved 10-Year Solid Waste Management Plan	10 Year Solid Waste Management Plan, Process
Cluster B: Strategic Bodies (40%)	LDC Functionality sub-indicators	
	Sanggunian-Approved PDPFP/CDP	Approved PDPFP/CDP, LDIP and AIP-LDC; SPS_CM, SPS_P
	Composition	Composition; SPS_CM, SPS_P
	Convened Local Disaster Risk Reduction and Management Council (LDRRMC)	LDRRM Council, Process
	Convened SWM Board	Local Solid Waste Management Board, Process

Cluster	Indicator	SGLG 2023 Data Source (column & sheet reference)
Cluster A: Financial Administration (40%)	Audit Opinion	COA Report, Process
	Utilization rate of the Local Development Fund	IRA Process; FAS_CM, FAS_P
Cluster B: DRRM (35%)	Utilization rate of LDRRMF	LDRRM Fund Process; DP_CM, DP_P
	DRRM Service Delivery Outputs	
	<ul style="list-style-type: none"> • Early Warning System 	Early Warning Systems, Process
	<ul style="list-style-type: none"> • Evacuation Center 	Evac Center Process; DP_CM, DP_P
	<ul style="list-style-type: none"> • Prepositioned goods 	Prepositioned goods, resources and services Process; DP_CM, DP_P
	<ul style="list-style-type: none"> • Equipped and trained SAR 	SAR or ER, Process
Cluster C: Utilization of Other Funds and Plans (25%)	Peace and Order (POC) Performance Audit rating, CY 2021	Peace and Order Performance Audit Report, Process
	Completion rate of, or fund utilization for, 2018 LSB Plan	Fund Utilization and Actual Completion, Process
	DSWD-accredited LGU-managed residential care facility	Residential Care Facility, Process

Formula Development

The formula for both capacity and performance utilizes a weighted average approach, giving higher importance to specific indicators that align more closely with the assumed impact of the increase in local revenue share. At the indicator level, this assignment of weights depends on the impact on local fiscal resources and the complexity of the indicator's requirement. Indicators that are connected to the NTA/IRA increase logic received higher weight values.

SEGMENTATION 2024

Two-Level Weight Assignment for Capacity Indicators

Because there are 12 indicators in Capacity, there are two tiers of weight assignments. Individual indicators are first 'weighted,' according to impact and complexity. Cluster weights are then applied.

Cluster weight assignments are as follows:

- Cluster A: Planning, Budgeting, Reporting = 40%
- Cluster B: Strategic Bodies = 40%
- Cluster C: Plantilla Officers = 20%

The lower weight assigned to Cluster C (Plantilla Officers) recognizes that Clusters A and B hold greater significance concerning the underlying logic (Capacity to effectively and efficiently allocate resources through planning).

Table 3. Weight Assignments for Capacity Indicators

Clusters	#	Indicators	Weight Value
Cluster A: Planning, Budgeting, Reporting	1	Approved Annual Budget	40%
	2	Compliance with the Full Disclosure Policy	25%
	3	DRR-CCA-related Plans and Documents <ul style="list-style-type: none"> ● PDPFP/CLUP (10%) ● LDRRMP (5%) ● LCCAP (5%) ● Contingency Plan (5%) 	25%
	4	Approved 10-year Solid Waste Management Plan	10%
Sub-total			100%
Cluster A			40%
Cluster B: Strategic Bodies	5	Local Development Councils <ul style="list-style-type: none"> ● PDPFP/CDP (25%) ● LDC Composition (30%) 	55%
	6	Local Disaster Risk Reduction and Management Council	15%
	7	Local Solid Waste Management Board	15%
	8	Anti-Drug Abuse Council	15%
Sub-total			100%
Cluster B			40%

SEGMENTATION 2024

Clusters	#	Indicators	Weight Value
Cluster C: Plantilla Officers	9	Local Disaster Risk Reduction and Management Officer	40%
	10	Local Social Welfare and Development Officer	20%
	11	Persons with Disabilities Affairs Officer	20%
	12	Local Tourism Officer	20%
		Sub-total	100%
Cluster C			20%
Weighted Average of all the Clusters			100%

Direct Indicator Weight Assignment for Performance Indicators

Due to the smaller number of indicators in Performance, consisting of only 7, the weights are distributed directly among these component indicators based on the general principles of impact and complexity. However, the subtotal of 'clustered' indicators still follows the same logic as the Capacity. Specifically, cluster weight subtotals are as follows:

- Cluster A Financial Administration = 40%
- Cluster B DRRM-related = 35%
- Cluster C Other funds = 25%

The variation in the weight values reflects that Financial Administration indicators in Cluster A convey a higher impact value compared to Cluster B and C.

Table 4. Weight Assignments for Performance Indicators

Clusters	#	Indicators	Weight Value
Cluster A: Financial Administration	1	Audit Opinion	20%
	2	Utilization of Local Development Fund	20%
Cluster B: Disaster Risk Reduction and Management (DRRM)	3	Utilization of Local Disaster Risk Reduction and Management Fund	15%

SEGMENTATION 2024

Clusters	#	Indicators	Weight Value
	4	Disaster Risk Reduction and Management Service Delivery Outputs <ul style="list-style-type: none"> ● Early Warning System (5%) ● Evacuation Center (5%) ● Prepositioning of Goods and Resources (5%) ● Search and Rescue or Emergency Response Teams (5%) 	20%
Cluster C: Other Funds	5	Peace and Order Council Performance Audit	12%
	6	Completion of Local School Board Plan	12%
	7	Residential Care Facility	1%
Weighted Average of all the Clusters			100%

Formula Deployment (LGU Assessment)

With the indicators identified and assigned weights (WA), the formula will then be applied to calculate the score of LGUs.

$$LGU\ Score = (Indicator\ 1\ x\ WA) + (Indicator\ 2\ x\ WA) + \dots + (Indicator\ n\ x\ WA)$$

The SGLG Data uses binary data, containing entries of 1s and 0s. In binary data, each entry represents one of two possible states, often used to denote the presence (1) or absence (0) of a particular characteristic or to represent a true/false condition.

Descriptive Baseline: Assignment of Descriptors to LGU Scores

At this stage of the process, each LGU has received a score for both capacity and performance. The next logical step is to assign appropriate descriptors for these scores. The technical working group has decided to use either 'high' or 'low' descriptors for scores through a defined threshold called a descriptive baseline. This threshold is derived from the average scores of all LGUs at a specific level, meaning there are different descriptive baselines for capacity and performance at every LGU level. Using the formula for getting the average, the descriptive baseline (DB) can be determined by adding all the LGU scores and then dividing the sum by the number (n) of scores:

$$DB = \frac{(LGU\ Score\ 1) + (LGU\ Score\ 2) + \dots + (LGU\ Score\ n)}{n}$$

SEGMENTATION 2024

If an LGU's score equals or exceeds the descriptive baseline for its LGU type, be it province, city, or municipality, then it is categorized as "high." This signifies that it surpasses the national average for its LGU type. The first segmentation analysis was based on the 2019 SGLG Data, which resulted in the following baseline values:

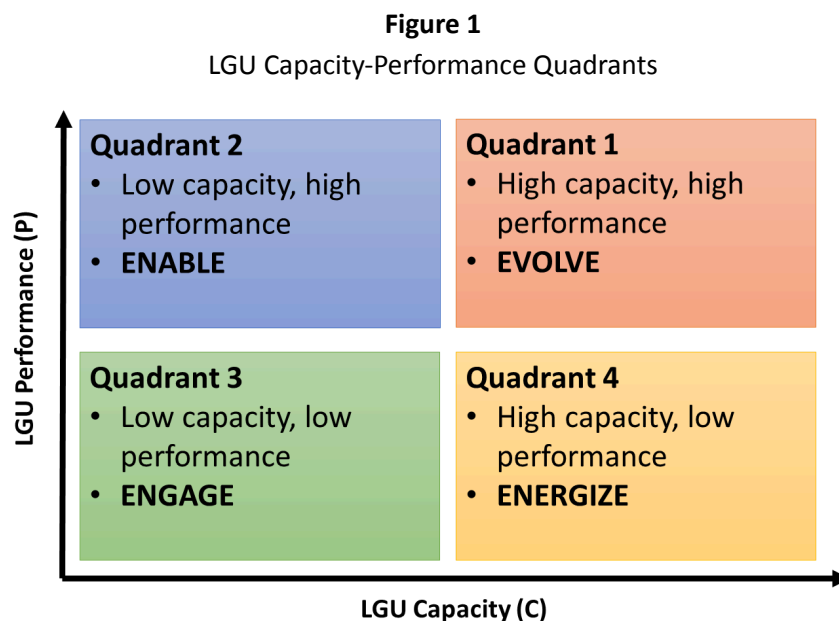

Table 5. Descriptive Baseline Scores

LGU Type	Descriptive Baseline for Capacity	Descriptive Baseline for Performance
Provinces	87.41%	80.51%
Cities	88.29%	84.87%
Municipalities	77.11%	70.73%

LGU Capacity-Performance Quadrants

As Capacity and Performance levels are determined, LGUs will be classified or segmented into one of the Capacity-Performance Quadrants.

- Quadrant 1 comprises LGUs with High levels of both Capacity and Performance. These LGUs are considered as models for other LGUs to emulate. The capacity development strategy for these LGUs is EVOLVE, aimed at propelling them to achieve development goals.
- Quadrant 2 includes LGUs with High Performance but Low Capacity. While these LGUs have achieved high-performance benchmarks, capacity issues limit their potential. The capacity development strategy for these LGUs is ENABLE, designed to resolve capacity issues and reinforce their performance.
- Quadrant 3 encompasses LGUs with low levels in both Capacity and Performance measures. These LGUs are considered the priority targets for capacity development interventions. Hence, the strategy is ENGAGE, aimed at providing them with various programs to help them meet their mandated functions and services.
- Quadrant 4 consists of LGUs with High Capacity but Low Performance. Despite their strong capacity, this capacity does not translate into high performance. The strategy for these LGUs is ENERGIZE, focusing on addressing the issues hindering their performance.

Results

This section presents the information and insights derived from the segmentation analysis, linking them to the core research questions of this report. The first part outlines the segmentation of Local Government Units (LGUs) into quadrants based on their capacity and performance levels. Following this, the variations in segmentation across different levels, income classes, and regions are examined. Finally, the analysis explores how these identified quadrants differ in relation to compliance with Capacity and Performance Indicators.

Overall Summary

The 2023 SGLG Data includes information on 1,698 LGUs across all levels. As shown in Table 6, Quadrant 1 contains the largest number of LGUs, totaling 736, which represents 43.35% of the total. Quadrant 3 follows with 534 LGUs, or 31.45%. Quadrant 2 comprises 295 LGUs, accounting for 17.37%, while Quadrant 4 has the fewest with 133 LGUs, or 7.83%.

Table 6. Segmentation of LGUs in Quadrants Based on Capacity and Performance Levels.

QUADRANT	No. of LGUs	% of LGUs
Q1: Evolve	736	43.35%
Q2: Enable	295	17.37%
Q3: Engage	534	31.45%
Q4: Energize	133	7.83%
Grand Total	1698	100.00%

Regional and Demographic Variations

Segmentation Across LGU Levels

LGUs operate within varying contexts, which affect their segmentation. This analysis explores how these factors shape the landscape of LGUs nationwide. LGUs are categorized into five levels: Component Cities (CC), Highly Urbanized Cities (HUC), Independent Component Cities (ICC), Municipalities and Provinces. Cities are further divided into Highly Urbanized Cities, Independent Component Cities, and Component Cities. Table 7 details the distribution of LGUs across these levels.

- **Quadrant 1:** 50 Component Cities, 17 Highly Urbanized Cities, 2 Independent Component Cities, 632 Municipalities and 35 Provinces
- **Quadrant 2:** 16 Component Cities, 2 Highly Urbanized Cities, 0 Independent Component Cities, 271 Municipalities and 6 Provinces
- **Quadrant 3:** 28 Component Cities, 11 Highly Urbanized Cities, 2 Independent Component Cities, 462 Municipalities and 31 Provinces
- **Quadrant 4:** 12 Component Cities, 3 Highly Urbanized Cities, 1 Independent Component Cities, 108 Municipalities and 9 Provinces.

P	35	6	31	9	81
Grand Total	736	295	534	133	1698

Segmentation Across Regions

In Table 8, the segmentation of LGUs varies across regions. Region III has the highest number of LGUs in Quadrant 1, with 101, followed by Regions I, II, VIII, and CALABARZON, which are also classified in Quadrant 1. On the other hand, Region VII exhibits a significant concentration of LGUs in Quadrant 3, totaling 79, with BARMM. Region V, and Region VIII also have notable numbers in this quadrant. MIMAROPA stands out with the most LGUs in Quadrant 4, totaling 21, with Region I having 14 LGUs and CALABARZON, and CARAGA each having 11 LGUs. Quadrant 2, which generally has the fewest LGUs across most regions, has CALABARZON with the highest number at 37 LGUs.

Segmentation by Income Class

According to Section 8 of the Local Government Code, LGUs are classified into income classes based on their revenue generation: First Class (highest income) down to Sixth Class. Additionally, there is a "Special" class for LGUs that do not fit into the standard income classifications. With that, Table 26 shows the distribution of LGUs across income classes within the Quadrants.

Out of a total of 1,698 LGUs, the distribution is most concentrated in the 1st and 4th income classes, with 425 LGUs (25.03%) and 424 LGUs (24.97%) respectively. In Quadrant 1 (Evolve), which has a total of 736 LGUs, the 1st income class is most represented with 219 LGUs. Quadrant 2 (Enable) includes 295 LGUs, where the 4th income class leads with 78 LGUs. Quadrant 3 (Engage) contains

SEGMENTATION 2024

534 LGUs, with the 4th income class having the highest representation at 141 LGUs. Finally, Quadrant 4 (Energize) has the fewest LGUs at 133, with the 1st income class having the highest count at 38 LGUs. The distribution highlights that higher income classes tend to have a greater number of LGUs across most quadrants, indicating a potential correlation between income class and strategic categorization. Note that some LGUs had missing income classification data presented in the first row of the table after the headers.

Table 26. Segmentation by Income Classes

Income Class	QUADRANT				Grand Total
	Q1: Evolve	Q2: Enable	Q3: Engage	Q4: Energize

*There are LGUs that remain unclassified in their income classes due to undisclosed revenues.

Compliance to Capacity and Performance Indicators

Compliance to Cluster A Capacity Indicators

In Table 27, overall compliance in the Capacity indicators on Cluster A show that most of the LGUs are able to follow the set requirements of the Seal of Good Local Governance (SGLG). The indicator with the highest compliance is the Annual Budget at 84.33%. The lowest compliance percentages are of the Full Disclosure Policy (FDP) and the Contingency Plan indicators at 66.84% and 67.96% respectively.

Table 27. Capacity Indicators Result for all LGUs - Cluster A

Cluster A: Planning, Budgeting, and Reporting	[FAS] Annual Budget	[FAS] FDP	[DP] PDPFP/ CLUP	[DP] LDRRMP	[DP] LCCAP	[DP] Contingency Plan	[EM] SWMP
All LGU Score	1432	1135	1056	1497	1232	1154	1347
Compliance Percentage	84.33%	66.84%	62.19%	88.16%	72.56%	67.96%	79.33%

SEGMENTATION 2024

Compliance to Cluster B Capacity Indicators

The results, as shown in Table 28, indicate that the majority of LGUs complied with the Local Disaster Risk Reduction and Management Council (LDRRMC) requirements, with a compliance rate of 79.39%. In contrast, the lowest compliance rate was observed for the Local Development Council (LDC), with only 58.78% of LGUs meeting the requirement.

Table 28. Capacity Indicators Result for all LGUs - Cluster B

Cluster B: Strategic Bodies	SPS] Has a Sanggunian-approved PDPFP/CDP	[SPS] LDC Composition	[DP] LDRRMC	[EM] SWM Board	[SPO] ADAC
All LGU Score	1265	998	1348	1213	1226
Compliance Percentage	74.50%	58.78%	79.39%	71.44%	72.20%

Compliance to Cluster C Capacity Indicators

As attributed in Table 29, compliance of the capacity indicators in Cluster C remains consistent with most of the LGUs being able to comply with the requirements and standards. With most of the LGUs having high compliance with the Local Disaster Risk Reduction Management Office (LDRRMO) at 90.34%. The lowest indicator observable is the availability of a Persons with Disability Affairs Office (PDAO) with a compliance percentage of 63.49%. The Tourism Officer indicator is notable as it does not apply to all of the LGUs as the availability of the office and position is limited and applicable to few.

Table 29. Capacity Indicators Result for all LGUs - Cluster C

Cluster C: Plantilla Officers	[DP] LDRRMO	[SPS] LSWDO	[SPS] PDAO	[THDCA] Tourism Officer
All LGU Score	1534	1188	1078	1614
Compliance Percentage	90.34%	69.96%	63.49%	95.05%

Compliance to Cluster A Performance Indicators

In Table 30, most of the LGUs are compliant to the standards set by the SGLG. In this cluster, the lowest compliance percentage is found on the Local Development Fund (LDF) Utilization at 68.08%. On the other hand, the Commission on Audit requirements are mostly met by LGUs at 80.74%.

SEGMENTATION 2024

Table 30. Performance Indicators Result for all LGUs - Cluster A

Cluster A: Financial Administration	[FAS] COA	[FAS] LDF Utilization
All LGU Score	1371	1156
Compliance Percentage	80.74%	68.08%

Compliance to Cluster B Performance Indicators

The results, as shown in Table 31 indicate that the majority of LGUs complied with Surge and Rescue (SAR), achieving a compliance rate of 83.75%. In contrast, the lowest compliance rate was observed for Evacuation Center with only 67.84% of LGUs meeting the requirement.

Table 31. Performance Indicators Result for all LGUs - Cluster B

Cluster B: DRRM	[DP] LDRRMF	[DP] EWS	[DP] EVAC CENTER	[DP] PREPOSITIONING	[DP] SAR
All LGU Score	1406	1321	1152	1235	1422
Compliance Percentage	82.80%	77.80%	67.84%	72.73%	83.75%

Compliance to Cluster C Performance Indicators

As shown in Table 32, the majority of LGUs demonstrated compliance with Residential Care Facilities (RCF), achieving a compliance rate of 98.11%. On the other hand, Local School Board (LSB) had the lowest compliance rate, with only 76.03% of LGUs meeting this criterion. It should be noted that the RCF indicator is not universally applicable as most LGUs indicate that the requirement does not apply to their area.

Table 32. Performance Indicators Result for all LGUs - Cluster C

Cluster C: Utilization of Other Funds and Plans	[SPO] POC Audit	[SE] LSB	[SPS] RCF
All LGU Score	1424	1291	1632
Compliance Percentage	83.86%	76.03%	96.11%

Conclusion

In evaluating the compliance rates of local government units (LGUs) with various criterias and requirements, this report provides pivotal insights into their performance and highlights areas where improvements are needed. In summary of the segmentation results, while various LGUs reached the 50% passing rate, there are indicators that are not universally applicable but LGUs are still subject to evaluation for. There are also indicators that are below or barely exceed 60% compliance for all the LGUs. There are notable discrepancies in compliance with other essential requirements, such as the high compliance rates in the RCF and the Tourism Officer indicators. These findings underscore that 31.45% of LGUs that did not meet the targeted capacity and performance indicators were therefore placed in Quadrant 3 due to low capacity and performance ratings. Thus, there is the need for targeted capacity-building interventions to address the areas of lower compliance and enhance their overall effectiveness. In conclusion, all quadrants should be equipped with the necessary strategies to supply the specific capacity development needs. However, with the focus on Quadrant 3 strategic efforts should be focused on improving compliance across all standards to ensure that LGUs continue to provide the most essential of public services.
